About Me

PADI-certified Divemaster with 150+ dives across 7 countries. Strong in dive planning, safety, and guest engagement, with specialties in Deep, Nitrox, Self-reliant and Peak Performance Buoyancy. Originally trained as a software engineer, I bring a detail-oriented mindset, strong communication skills, and a passion for adventure and marine conservation. My goal is to combine my ability to showcase the underwater beauties of the ocean with raising awareness about marine life by emphasizing respect, appreciation, and protecting these environments without causing impact.
